PROTESTED JUNE 25, 1924, BY LOVELOCK VALLEY DRAINAGE DISTRICT NO. 1.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued with the understanding that the use of water hereunder will in no way interfere with the drainage operations of the Lovelock Valley Drainage District No. 1, same being in accordance with the stipulation entered into between the applicant and Lovelock Valley Drainage District No. 1. The State reserves the right to regulate the use of the water at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.00 cubic feet per second.

Actual construction work shall begin on or before August 6, 1926

Proof of commencement of work shall be filed before September 6, 1926

Work must be prosecuted with reasonable diligence and be completed on or before August 6, 1927

Proof of completion of work shall be filed before September 6, 1927

Application of water to beneficial use shall be made on or before November 6, 1932

Proof of the application of water to beneficial use must be filed with State Engineer on or before December 6, 1932

Proof of labor filed Dec. 25, 1926

Proof of completion of work filed Apr. 2, 1927

Map filed March 31, 1927

WITNESS MY HAND AND SEAL this 6th day

Cancelled NOV 28 1936 because of failure of applicant to comply with provisions of permit.

State Engineer

State Engineer.

Compared 7

The point of diversion is in the SW corner of the SW $\frac{1}{4}$ Section 18 T. 25 N., R. 31 E., MDM., instead of in the NE corner of the NE $\frac{1}{4}$, Section 24, T. 25 N., R. 30 E. MDM.

The works proposed to be used for the diversion of the water appropriated are as follows:

A removable dam or dam with removable and adjustable gates is to be constructed at the point of diversion for the purpose of diverting the water through pipes or ditches into ditches on applicant's land and thence upon the lands for irrigation and stock watering.

The pipes or ditches entering the main supply canal are to be equipped with gate devices so as to permit the closing of the same. It is proposed to so adjust the gates or spillway in the dam in the main canal so that damage to other lands by seepage will not occur. The gates being either opened or closed, as the flow of water in the main canal may require.
